

# Jason Saba

## Front-End Developer

Web / App / UI-UX

## Skills & Technologies

## Education

2008-2011

**DeVry University**

Associate of Applied Science in Web Graphic Design

## Other Interests

When I'm not building something for the web or learning about how to build something for the web and expand on the deficits in my skillset, I have other life interests as well such as working in my garden, riding motorcycles, building things with my hands, playing volleyball and keeping a keen eye on my health and fitness by eating right and working out often.

## Experience

Cubicle Ninjas, LLC - Dec. 2013 - Jul. 2015 **AND** Dec. 2017 - May 2025

### Front-End Web Developer

- Hand-coded responsive websites/apps using standards-based, WCAG accessibility compliant HTML, CSS (SASS), JavaScript, & PHP from designs provided by the in-house design team.
- Sites were primarily WordPress-based. Created custom themes and plugins for specific functionalities and integrations required.
- Typically handled most of the one-off front-end projects that required a more custom approach.
- Performed Database Migrations and Manipulations.
- Setup and configured DNS records to facilitate staging and production environments.
- Configured deployment mechanisms to deploy to those environments.
- Hand crafted HTML emails and templates to be deployed using systems like MailChimp.
- Built various smaller single purpose applications using ReactJS and VueJS.

TeMeDa, LLC - Jul. 2015 - Dec. 2017

### UI/UX Developer

- Created UI wireframes and prototypes which later lead the direction of the app's interactivity.
- Introduced task automation with Gulp into the front-end workflow.
- Created the front-end of a React Native app for field tech use to install assets.
- Created the front-end of the production React Native app for end users.
- Performed cross-browser testing with VM's to ensure the primary web app was within brand standards and functionally sound.

Officite, LLC - Feb. 2012 - Dec. 2013

### Lead Front-End Developer

- Hand-coded responsive templates using standards-based, WCAG accessibility compliant HTML, CSS (SASS), JavaScript, & PHP from designs provided by the in-house design team.
- Integrated sites into a proprietary CMS as well as WordPress.
- Codebases were managed and versioned with SVN.
- Performed cross-browser compatibility debugging against all major browsers (IE7+).
- Built HTML E-Blasts designed by marketing and implemented distribution via Exact Target. Distribution lists, reporting, and campaigns were managed with Salesforce.
- Often took on the role as an intermediary between Front-End Development Department and Client Services Department whenever a Client Service Rep. was running into trouble with code they couldn't figure out.
- Contributed to the research, development & implementation of departmental-wide coding standards to promote consistency in production code.
